

International Conference on Fast Reactor and Related Fuel Cycles(FR09)

11 December

From December 7th through December 10th, International Conference on Fast Reactor and Related Fuel Cycles(FR09),organized International Atomic Energy Agency(IAEA) was held in Kyoto,Japan.

About 700 participants including nuclear specialists and university students from home and abroad attended the conference to discuss significant issues on fast reactor cycle technologies and exchange information on development plants and achievements of each country as well as in multilateral frameworks. Further,both overseas and Japanese companies and the international organizations introduced up-to-date fast reactor technologies at the industrial exhibition of the conference with panels and products lined up, and quite many conference attendees were taking a serious look at them.
